Landing page
- Remove the top line above the titles
- Make sure type treatments are the same
    o Labels below their images with the same alignment
    o Define superstars in the same type styles as you define Warhol

Nav
- Love the hover idea–try adding a slightly darker or lighter overlay on images as you hover to show that they're buttons to individual pages
- On mobile/tablet, you can just use a standard dropdown menu button, like the 3-lines icon or two arrows

Sources
- Use as many as ya need, but cite them!

Photographs
- Make sure the photo of Edie isn't on the Nico page!
